Electrical Plan

****Electrical Notes****

ELECTRICAL UPGRADES: PER LOCAL CODES

- Replace & Relocate a new 200 Amp SES
- Raise height of SES Riser & Weatherhead to meet APS & 2012 Code Requirements. Include Weatherproof J-Box at existing location, weatherproof chaseway & fittings, and circuitry to new approved SES location.
- New Electrical includes installing/replacing GFCI receptacles at Bathrooms and in the Kitchen, install new Exterior GFCI receptacles at front and rear of house, Battery Operated SD & CO Detectors where applicable, install (2) new energy efficient bathroom vent fans vented to the exterior, and lights w/switches at front rear patios. Replace light kit at Dining Room ceiling fan, install new switch and light in Den, and replace Fan with light kit in Master Bedroom.
- Trench walls approximately 1"-1 1/2" & protect romex with 3/4" EMT where applicable to access adobe or CMU walls for installing wiring and/or outlets. Or, install approved surface mounted molding or chaseway.

SD = Smoke Detectors

SD CO = Smoke/Carbon Monoxide Detectors
