

	<p align="center">City of Casa Grande <i>Development Center Policies & Procedures</i></p>	<p>Effective Date: July 1, 2016</p>
	<p>Title: Permit applications with multiple structures</p>	<p>Date Reviewed: July 1, 2016</p>
		<p>Department of Primary Responsibility: Building Safety</p>
		<p>Policy Number: B - PR - 008 – 2016</p>

Because code limits the number of utility connections, the Building Official will review all requests for additional utility connections. The owner must have a written request for any additional utility connections giving the reason for the additional service. Additional service connections require Building Official approval before issuing a permit.

Once the Building official has approved the second utility connection the application shall be reviewed by the planner assigned to that area to check for zoning compliance. If the structure complies with zoning requirements, the permit is scheduled for building review.

Once the reviews are completed the permit is processed as usual.
