Robert Huddleston * Chief of Police

Property Owner/Resident

The Casa Grande Police Department Graffiti Abatement Program works with property owners and residents of our community in an attempt to combat unsightly graffiti. While city ordinance requires residents to remove graffiti from their property, we at your Police Department understand that sometimes assistance is needed in meeting this requirement.

The graffiti abatement program was created to assist the community in this effort and is willing to attempt to cover or remove graffiti that has been identified on your property. We do need to insure that you understand that our laborers are not experienced painters and will only cover the area affected by the graffiti. If you require larger areas painted to maintain proper color matching, we suggest you contact a local painter. We will do our best to match colors and provide coverage that will not be unsightly.

Please take a moment to read the statement below and sign the bottom if you would like your police department to assist in covering or removing graffiti on your property. If you wish to give authority for the graffiti abatement program to cover/remove any additional graffiti located on your property in the future, please check that additional item on the form. Thank you.
