Subject: Re: Finished Floor Elevations in Zone A

Wonderful, thank you A.J. I appreciate your time & efforts to look into this. The additional cost (to meet the AO) would have prevented needy families from qualifying for their loans . You are their hero!

>>> A.J. Blaha 03/13/02 02:13PM >>>

After an exhaustive reading marathon this morning in Part 44, CFR, I've come to the conclusion that finished floor elevations in Zone A are determined by the floodplain administrator so that the proposed building will reasonably safe from flood damage. The two foot above existing grade is only for Zone AO, where average flood depths are know (flood depths have not been determined in Zone A). My call on the structures on Brown would be that they meet the 14" above curb elevation, and that they meet the UBC requirements for elevation above grade.
